1 Entrance Requirements

Basic entrance requirements for studying Vocational qualification in Business Management:

- Completed Finnish comprehensive school or other basic education (approximately nine years, age 7-16)
- Good written and oral command in English language

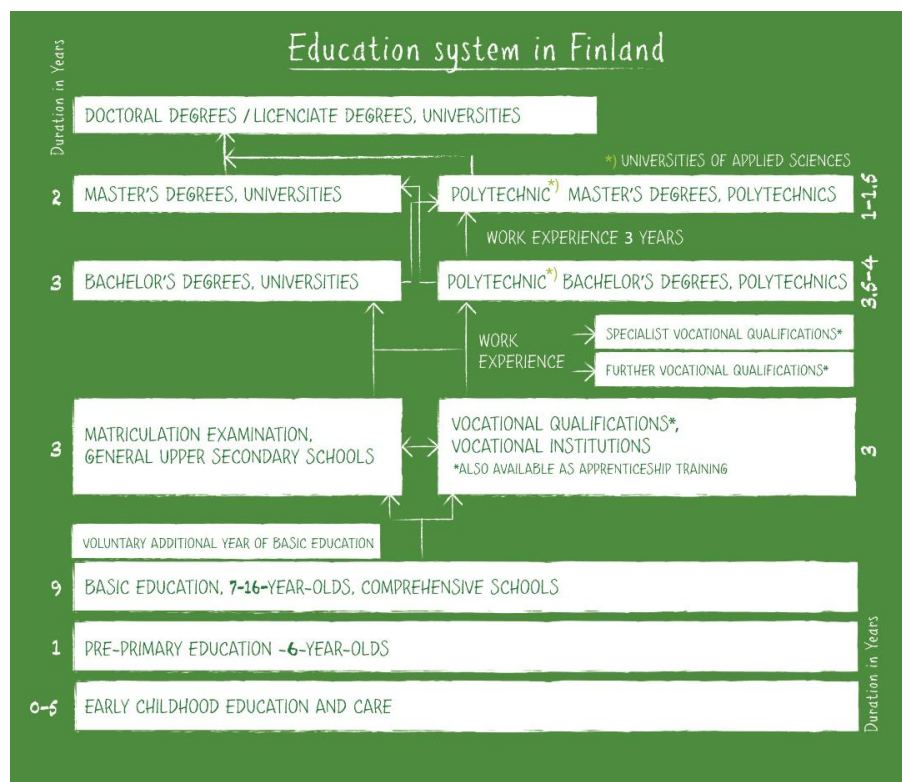

This study programme is for those who have completed basic education and are without completed vocational qualification.

Upper secondary or higher education graduates with completed qualification will be accepted only in exceptional cases if there are free study places.

We can yearly accept a few applicants without the Finnish national qualifications in basic education. In this case we require that the applicant has the necessary capacity to study in the programme and also has a well grounded reason to study in Oulu vocational College.

Admission points are awarded for general academic success, for work experience and for entrance examination results. Extra points are awarded to applicants who have finished basic education in the same or previous year as the application period.
